16/8/02	<p>Meeting @ John Boatman, Dave Webb + Richard gave them advice about concern re DDA & at present company not providing good working environment. All agreed. Richard already appointed to work with him - started 3 days ago - says Brian very bright, doing good computer work and already sorted out 1-2 areas with him. - John Boatman listened to my concerns about the job being difficult to do because of systems and then we established that Brian was having to estimate machine downtime sometimes - John was concerned that system needs reviewing in that case because the info being gathered was not going to be useful if inaccurate. - he will examine this with expert.</p>	
	<p>Richard reported Brian was happy going forward & he also had a bit of work done - job removed the crosses (1/2 hr per day) - David Shubb doing that now</p>	
	<p>D/W Brian 12.15 - says a bit happier due to plan + not dealing direct with Dave Webb.</p>	
11/9/02	<p>3 attacks (hrs a day - small (del. side) followed by dizziness & fear & hearing through inside voice - can't hear exactly words</p>	
10/9/02	<p>Today - pain in forehead + temple scalp sometimes over L fronto-parietal area. No tablets - Under neurologist - will get appointment +</p>	
	<p>It's working down for now - advice not very</p>	
18/12/02	<p>One back RVI - epilepsy specialist appt Jan Started tablets - about 3/12 ago when went off sick. Thinks hasn't had the attacks since being off until 1 week ago after getting letter to attend here - had 2 attacks that night - 1 in bed, 1 at toilet that night - small, dizziness fearful Haven't had good sleep since letter "just want stuff sorting" SH/ living alone. Both parents alive - had to live in them for 2/02 after discharge - hospital wanted him to go back Plus his brother sometimes - lives nearby. Gets on OK. Good rel. in GP</p>	
	<p>not Kepra for epilepsy & Codare & Abiliparol for pain</p>
